

Keeping your building performing at its best

Reducing your energy consumption with efficient, modern alternatives for heating and cooling, cutting your overheads and improving the comfort and wellbeing of your customers and staff

The Full Service

Europe Air Conditioning design, install and maintain innovative air conditioning systems, applying proven technology, to deliver energy efficient and easily managed solutions.

Our aim, whether a retail, commercial, industrial, leisure or healthcare application, is to provide a pleasant working environment, all year round, through precise cooling, heating and ventilation control.

Our range of facilities management and building maintenance services cover all mechanical, electrical and public health services.

Our qualified engineers have over 15 years experience in the industry. We also provide routine maintenance contracts and 24 hour, 365 days a year, national call out service in event of breakdown.
